Creating News Items

To create a news item go to the Group for which the item is to be created. If you have manager permission on the group you should see the "Add News Item" button above the News Item List.

Click the "Add News Item" button and fill out the news item content.

A screenshot of a 'Create News Item' form. The form has a title field with the placeholder text 'News Title'. Below the title field is a 'Content' section with a rich text editor. The editor has a toolbar with icons for bold, italic, link, unlink, list, and other formatting options. The content area is divided into two columns, each with the placeholder text 'Content Here'. At the bottom right of the form, there are two buttons: a green 'Create' button with a checkmark icon and a red 'Cancel' button with an 'X' icon.

Once the content is filled out click the "Create" button to save the news item. Once the save button is clicked the news item should appear at the top of the news scroll.

Editing News / Pinned News

News Items can be edited by clicking on the edit icon located next to the news title.

Once edits are complete click the save button to persist the changes.

News items cannot be deleted. If you need to hide a news item set it's status to "Hidden"

You may want to have a news item always appear at the top of the list if it has important information. News items can be pinned to the top of the list. Multiple pinned items will still display most recent pinned item first.

Unhiding News Items

If you need to recover a news item or make it visible again you can click on the "Manage Hidden" button to view all hidden news items.

To un-hide an item click on the eye icon next to the title and timestamp.
