

Change User Permission

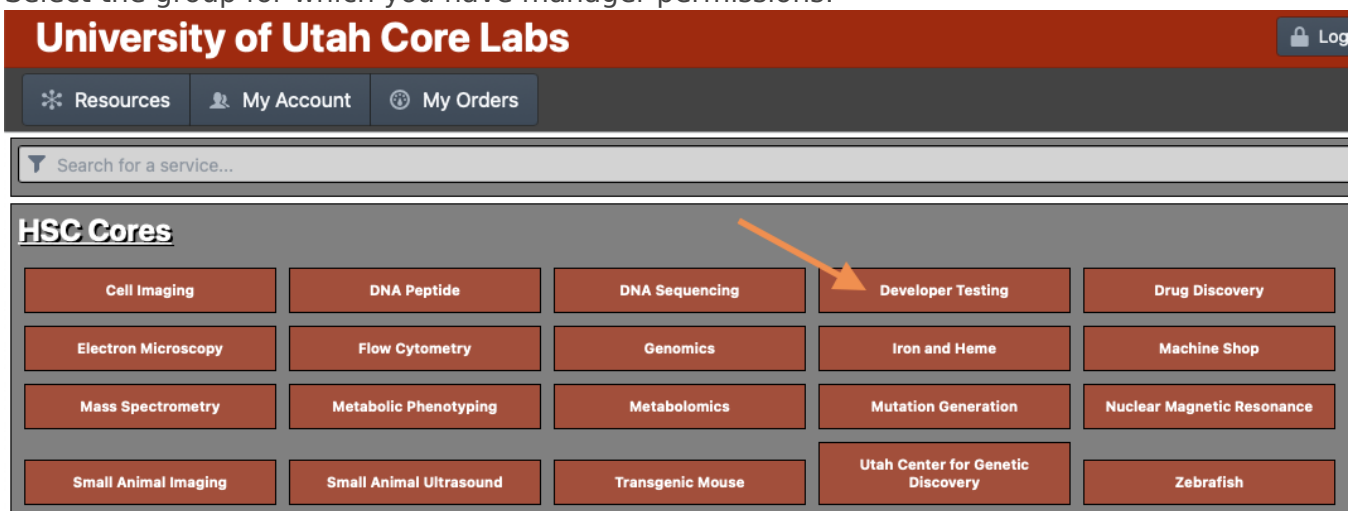

When logged in as a manager for a group it is possible to grant other users various levels of access to the groups that you control.

Permissions

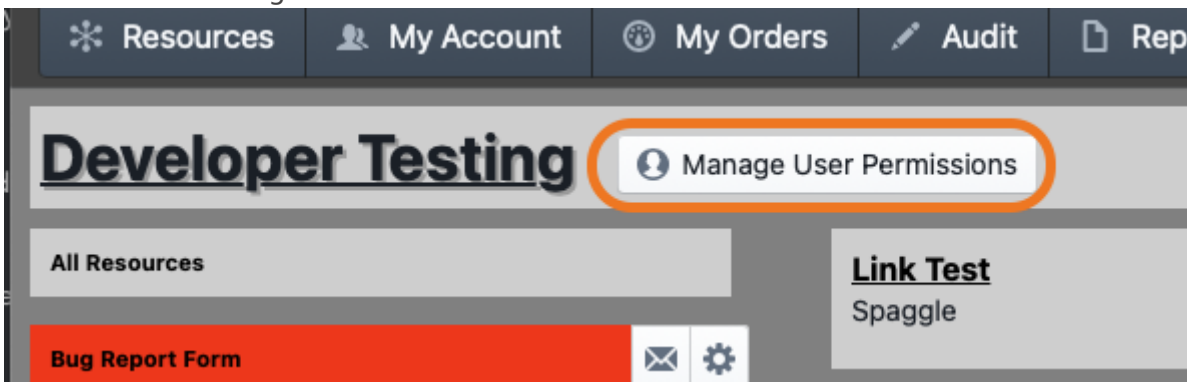

1. Disabled - Denies user access to your group.
2. User - The default state of any users when a permission is created or if no permission exists
3. After Hours User - Allows the specified user to use scheduled services also marked as allowing after hours in after hours slots
4. Manager - Allows the specified user to manage the group

Adding a Permission

1. Select the group for which you have manager permissions:

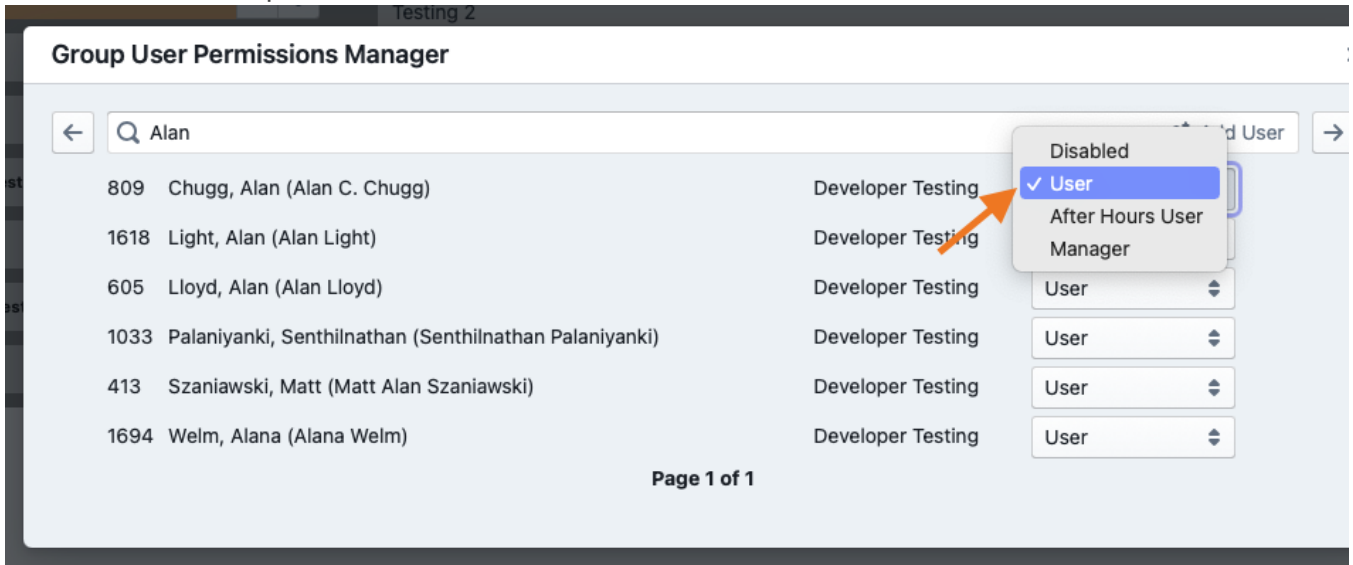

2. Click on the "Manage User Permissions" Button

3. Search for the name of the person you wish to alter a permission for (partial search is fine).

4. Click on the dropdown box next to the person you want to change the permission for and select the desired permission.

5. Repeat steps 3 to 4 for as many users as you want. When finished click the "X" in the top right corner of the dialog to close the dialog and return to the main page.
