

# Order Form Service Configuration

Line Item services for the resource system represent an order for services that have an item quantity and price per item. Generally this means that any service that is not a scheduled service is treated as a line item service. Configuration of a line item service is broken down into a number of sections identified below. Line Item services share most of their configuration with scheduled services.

## Creating a new service

A new service can be created by clicking the "Create New Service" button located above the service list search box

The screenshot shows a web interface titled "Service Search List". At the top left, there is a button labeled "Create New Service" with an orange arrow pointing to it. Below the button is a search input field with the placeholder text "Name" and a blue dropdown arrow icon. Below the search field, there is a pagination bar showing "Page 1 of 1" with left and right navigation arrows. Below the pagination bar, there are two service entries, each with a bold title and the status "Enabled": "Bug Report Form" and "Developer Schedule Testing".

Newly created services will not exist until saved after initial configuration. This means that some functionality that needs an id number such as creating service rates will not be available until the user click the "Save" button to save a newly created service.

## General Config

Enabled  Notification Verbosity  Manager Only

Yes

All Actions

No

- **Enabled** - Whether this services is actively in use
  - Yes - Active
  - No - Inactive
  - Archived - Inactive and hidden from search list. (Used for removing services from general use and decluttering un-used service records)
- **Notification Verbosity** - When to send notification emails for actions that occur on the service
  - No Messages - No notifications sent
  - On Create - Only send order creation notifications
  - On Delete Only - Only send event deletion notifications (Delete not applicable for Line Item Orders)
  - On Create/Delete - Only order notification when an event is created or deleted (Delete not applicable for Line Item Orders)
  - All Messages - Send notification for all event creation, update, and delete actions (Delete and Update not applicable for Line Item Orders)
- **Manager Only** - Controls if service is visible/available to all users of a facility or just facility managers

## Tags

### Tags

Tag strings used by the system for categorization and certain actions. No special tags are defined for services at this time.

## Custom Data Config

Data 1 Label

Label

Description		
Test Item		
Amount	Rate	Line Total
<input type="text" value="0"/>	\$10.00	\$0.00
Vendor Price		
<input type="text" value="(Optional)"/>		

Some services may require additional information to perform. Up to 5 custom data fields may be enabled for the ording user to enter custom information. These custom fields will appear as text input boxes at the bottom of the line details with the provided data label/query.

## Service Presets

Service Presets							
Label	Type	Per Item Rate	Commercial Rate	Minimum Quantity	Maximum Quantity	Conditional Fee	Delete
Test Item	Per Item (Required - Editable)	10	100	0	10	0	
Add Preset							

Line item services have presets instead of rates. These presets serve a variety of purposes depending on the the type of service. For "Line Item" and "Order Form" type services the line presets serve as pre-filled lines. The only difference between a "Line Item" and "Order Form" service is that "Line Item" services allow ordering users to add manual lines to the order. Line item services can have zero or more presets. Generally "Line Item" type services will have no presets and serve as a manager only order form. Service presets have 7 configuration fields of which the first 4 are required:

1. **Label** - The Description to be attached to this line item
2. **Type** - The line preset type
  - Per Item - A fully configurable/removable line item

Order Lines				
Description	Amount	Rate	Commercial Rate	Line Total
Test Item	<input type="text" value="0"/>	<input type="text" value="10"/>	<input type="text" value="100"/>	\$0.00
Vendor Price				
<input type="text" value="(Optional)"/>				

- Per Item (Required - Editable) - A order form line item with a alterable quantity

Description		
Optional Item		
Amount	Rate	Line Total
<input type="text" value="0"/>	\$10.00	\$0.00
Vendor Price		
<input type="text" value="(Optional)"/>		

- Per Item (Required - Fixed) - An uneditable "fee" style line item

Description			Vendor Price	Line Total
Fee Item			<input type="text" value="(Optional)"/>	\$0.00
Amount	Rate			
<input type="text" value="0"/>	\$10.00			

3. **Per Item Rate** - The cost per item to default to or enforce
4. **Commercial Rate** - The cost per item to default to or enforce for commercial accounts
5. **Minimum Quantity** - The smallest number of this item the user can select. (Serves as the default field value, only enforced on (Required) preset types)
6. **Maximum Quantity** - The largest number of this item the user can order. Defaults to 0 where 0 allows unlimited quantities. (Only enforced on (Required) preset types for values above 0)
7. **Conditional Fee** - Used by the BBSP and other Sample Processing service types. No effect for general line item services.
