

Sequencing Drop Off Sites

We currently have three sequencing drop off sites around campus.

HCI - End of the bench 4Y, 4th floor Research North Building. PICKUP TIME 11:00AM

Biology Building, Bldg 84, Room 202A (Mailroom in the small fridge). PICKUP TIME 11:30AM

DNA Sequencing Core Laboratory, Building 585 Room 110 (small white fridge on the counter next to Derek's office)

After hours drop off location: Building 585 Room 114 (Walk in fridge just down the hall from the DNA Sequencing Lab. Please note: The building locks down at night until early morning and I cannot get people access to the building for drop off purposes. If you already have access, this location is available when we are not open. Please drop samples in the Core when we are here. Thank you.

NOTE: If there are areas that are significantly distant from these locations, we would be willing to consider adding more. To do so, we would need a lab willing to host the drop off location that would allow access to other users in your area to come drop samples off during the week. This could include a walk in fridge, a lab fridge, etc. We would just need a small space that we can clearly mark and leave a few racks for samples to be placed in.

Revision #1
