

# Rough Quote Drafting

Following the initial meetings with the stakeholders, the SD2C Director will meet with the assigned staff to draft a quote.

The SD2C Director and assigned staff member will set a time to draft an initial quote for the project. Here, they will discuss the design cycle, development strategy, and deployment time for the technologies.

Note: This Project quote will be drafted based on line item costs as shown on the [SD2C Services Site](#). This is typically quoted to match timeline, budget, and scope of project. Since the SD2C only charges for hours worked, the final amount may vary from this quote.
